Dual-Roundabouts

know your way around
roundabouts

Motorist	Large Vehicles	Pedestrians	Cyclist
<p>Always yield to the vehicle on your right Do Not Use Outer Lane for No More than Two Exits!</p> <div style="display: flex;"> <div style="width: 50%; padding-right: 5px;"> <p>DRIVING LEFT</p> <p>When turning left:</p> <ul style="list-style-type: none"> • Approach from the outer lane • Move to the inner lane • Give way and enter when there is a safe gap • Release left hand • Stay in the Outer Lane </div> <div style="width: 50%; padding-left: 5px;"> <p>DRIVING RIGHT ON MAINWAY & 27 DRIVE</p> <p>When turning right or making a U-turn:</p> <ul style="list-style-type: none"> • Approach from the inner lane • Release left hand • Give way and enter when there is a safe gap • Stay in the inner lane • Release left hand </div> </div>	<p>Large Vehicles</p> <p>Drivers should be aware that large trucks may not be able to turn right. Therefore, when you are driving in an exit lane, check the rearview mirror through a rear window to see if a truck has a right hand roundabout as a way through to you.</p> <p>Large Trucks</p> <ul style="list-style-type: none"> • When making a U-turn, check for oncoming traffic in the inner lane • When turning right, check for oncoming traffic in the inner lane • When turning left, check for oncoming traffic in the inner lane 	<p>Pedestrian Rights</p> <p>Before crossing the roundabout, pedestrians should check for the direction of traffic flow. That is, if you are walking on the inner roundabout, you should give way to traffic on the outer roundabout. If you are walking on the outer roundabout, you should give way to traffic on the inner roundabout.</p>	<p>Cyclist</p> <p>Always keep an eye on the traffic and consider that you may need to dismount. If you are on the inner roundabout, you should give way to traffic on the outer roundabout. If you are on the outer roundabout, you should give way to traffic on the inner roundabout.</p>
<p>DRIVING STRAIGHT AHEAD</p> <p>When going straight ahead:</p> <ul style="list-style-type: none"> • Give way and enter when there is a safe gap • Release left hand • Release both hands and stay in that lane 	<p>DRIVING STRAIGHT AHEAD</p> <p>When making a Right Turn:</p> <ul style="list-style-type: none"> • Release left hand • Give way and enter when there is a safe gap • Release both hands and stay in that lane • Release left hand • Give way and enter when there is a safe gap • Release both hands and stay in that lane 	<p>Choose Your Lane:</p> <p>Lane choice at a roundabout is similar to a standard intersection. When approaching, choose either the outer or inner lane that corresponds to your desired movement. Lane choice is based on the driver's intention. The outer lane allows right, straight ahead, and left movements. The inner lane allows only the inner lane movement (usually straight ahead or straight ahead movements).</p> <p>Emergency Vehicles:</p> <p>Always give emergency vehicles the right of way when they approach. If you have just entered the roundabout, pull over to the right allowing emergency vehicles to pass. Never enter the roundabout. Continue to your exit and then pull over to the right allowing the emergency vehicles to maneuver around you.</p>
